

TEMPTATION

Our TEMPTATION range was developed specifically to display lingerie, swimwear, and nightwear. The poses represent confident young women expressing their playful side. The relaxed yet seductive poses look fantastic in groups and make an exciting window display that will catch everyone's eye. These realistic mannequins look beautiful with our edgier make-up looks, but will still look fabulous if you opt for one of our semi-abstract heads.

75B / 34B or 80C / 36C

Special torsos for push-up bras

When you dress a standard torso with a push-up bra, you will see that the bra does not fit properly because the push-up inlay does not adapt to the inflexible shape of the torso. GENESIS MANNEQUINS has developed two clever solutions for this:

Removable magnetic pad system for torsos and mannequins (CFWP-02 & GFWP-15)

When you remove the pads, there is enough space for the push-up inlay of the bra and the bra fits properly. The pads are magnetic and can be taken off or put back on easily so that any bra can be presented.

Torso with soft touch chest (GFWA-16)

This torso has a soft foam inlay in the chest area to which push-up bras adapt perfectly. The foam is not visible under the various fabric options.
